Dwarka, New Delhi

February 2026 – June 2026

- Developed a unified e-commerce platform using **Flutter** and contributed to networking project development.

Opsight AI Pvt. Ltd.

Software Developer Intern

Noida, New Delhi

July 2025 – September 2025

- Contributed to LMS development using **React.js**, **Node.js**, and **MongoDB**.

Projects

Unified E-commerce Ecosystem

June 2026

- Developing a mobile application using **Flutter** and **Dart** to unify multiple e-commerce services into a single platform.

Mental Wellbeing Platform (SIH 2025 Grand Finalist)

November 2025

- Developed a 4-tier mental wellbeing platform (User, Health Buddy, Therapist, Admin) with chatbot integration, appointment booking, and secure role-based workflows.
- Implemented real-time chat using Socket.io and audio/video consultations via WebRTC with a dedicated therapist dashboard for appointment management.
- Integrated an ML-based monitoring system to analyze conversations and ensure safe and ethical interactions.

Learning Management System

July 2025

- Developed a full-stack LMS platform with multi-role architecture (Super Admin, Instructor, User) enabling secure role-based access, course approvals, monetization, and analytics.
- Built a course creation system for instructors with modules, quizzes, assignments, announcements, and progress tracking.
- Implemented personalized dashboards, assessments, certificate generation, and deployed the platform on Azure VM using **Nginx** as a reverse proxy for secure and scalable deployment.

E-commerce Platform

June 2025

- Built a responsive e-commerce platform for electronics with B2B bulk enquiry support.
- Designed and integrated an admin dashboard to manage categories, products, orders, and user enquiries. Enabled admin-to-user quotation system via email for bulk orders.

Women Safety Web App — Secured 3rd Position – HMRITM Tech Fest

May 2025

- Built a full-stack MERN app enabling women to send real-time distress alerts to emergency contacts and nearby users via pincode-based notifications.
- Developed secure REST APIs with Node.js & Express.js, handled user authentication (JWT), and integrated MongoDB for data storage.

Employee Management System — React.js, Tailwind CSS

March 2025

- Developed the frontend of an Employee Management System using React and Tailwind CSS.
- Implemented role-based authentication for employees and admins, displaying respective dashboards.
- Designed an employee panel to categorize tasks as accepted, completed, and failed.

Achievements & Certifications

Consistently ranked at the top

Present

- Secured 1st rank in college and 18th rank in GGSIPU with a CGPA of 9.58, proving my ability to learn fast and stay ahead.

SIH 2025 Grand Finalist Ongole, Andhra Pradesh

November 2025 – December 2025

- Recognized as Grand Finalist by leading a team of 6 members and got selected among 1.41 lakh+ national teams.

Excelled in academics with a sharp grasping ability

2020-2022

- Scored 92.6 % in 10th and 94.6% in 12th, a result of dedication and focused learning..

NPTEL – Programming, Data Structures and Algorithms using Python — IIT Madras

Jul–Sep 2024

- Elite certified. Learned core Python programming, data structures and algorithm design techniques

NPTEL – Python for Data Science — IIT Madras

Jul–Aug 2024

- Elite + Silver certified. Covered Python for data analysis including Numpy, pandas, and real-world data handling practices.
